PROFESSIONAL SUMMARY

Software Engineer with production deployment experience at Infosys Springboard and a peer-reviewed IEEE Xplore publication (2025). Strong foundation in data structures, algorithms, and object-oriented design, with hands-on experience building scalable REST APIs, microservices, and full-stack systems in Java, Spring Boot, React.js, and Node.js. 100+ LeetCode problems solved; proven track record of shipping production-grade software in Agile teams.

TECHNICAL SKILLS

- **Languages :** Java, Python, JavaScript, TypeScript
- **Data Structures & Algorithms :** Arrays, Trees, Graphs, Dynamic Programming — 100+ LeetCode problems, HackerRank (4 Badges)
- **Backend :** Spring Boot, Spring Security, Django, Node.js, REST API Design, JWT, WebSockets, Maven, Servlets
- **Frontend :** React.js, Angular, Next.js, HTML5, CSS3, Tailwind CSS
- **Databases:** MySQL, PostgreSQL, MongoDB
- **System Design & Practices:** OOP, MVC, Microservices, HLD/LLD, System Design, Agile/Scrum, SDLC, Unit Testing
- **DevOps:** Docker, Kubernetes, Git, GitHub, CI/CD fundamentals

INTERNSHIP EXPERIENCE

- **Java Full Stack Developer, Project Lead** **Infosys Springboard** Sep 2025 - Nov 2025

  Java · Spring Boot · React.js · MySQL · JWT · WebSocket · JUnit · Docker · Agile/Scrum Remote, India

  - Led a team of 5 engineers through a 12-week Agile development cycle, driving sprint planning, task allocation, code reviews, and on-time delivery of a production-grade full-stack application.
  - Engineered and deployed 20+ secure RESTful APIs using Java, Spring Boot, Spring Security, Hibernate/JPA, and JWT-based authentication with role-based access control (RBAC); contributed to HLD, LLD, and database schema design.
  - Developed and integrated React.js frontend modules with Spring Boot backend services using REST APIs and WebSocket (STOMP), reducing UI-backend integration failures by 40% through well-defined API contracts.
  - Executed 50+ unit and integration test cases using JUnit and Postman, resolved 25+ defects, and containerized the application with Docker, achieving a 98% stable deployment rate across sprint deliverables.

PROJECTS

- **NeuralLog — LLM Inference Logging & Analytics Platform** Github

  Tools: Java · Spring Boot · React.js · MySQL · Docker · Kubernetes · SSE · OpenAI/Gemini/Groq APIs

  - Architected a full-stack LLM observability platform with a pluggable provider abstraction layer (OpenAI, Gemini, Groq); built 20+ RESTful APIs in Spring Boot and implemented real-time token streaming via Server-Sent Events (SSE).
  - Designed an asynchronous inference logging pipeline (Spring @Async) capturing latency, token usage, cost, and error metrics with automated PII redaction, without degrading inference performance.
  - Containerized with Docker and deployed to Kubernetes (HPA, Ingress, Persistent Volumes); built React.js dashboards backed by MySQL for real-time monitoring.

- **FlightNest — Multi-Role Flight Booking Platform** Github

  Tools: Spring Boot · Angular · Spring Security · JWT · Hibernate/JPA · MySQL · TypeScript

  - Engineered a full-stack flight booking platform with RBAC across 3 user roles (Customer, Pilot, Admin) and JWT-based Spring Security authentication.
  - Designed a normalized MySQL schema supporting concurrent booking, cancellation, and schedule management; optimized multi-join queries to reduce average read latency.

- **Herbal Plant Identifier — Mobile Application** Github

  Tools: Tools: Flutter, Dart, TensorFlow Lite, Python, OpenCV, Pandas, NumPy

  - Developed a cross-platform Flutter application with a TensorFlow Lite model for real-time, offline herbal plant identification using image capture and gallery input.
  - Built a modular frontend with an integrated AI chatbot, role-based features, and persistent local data storage to deliver a responsive user experience.

EDUCATION

- **Kalasalingam Academy of Research and Education** CGPA: 8.3

  B.Tech in Computer Science and Engineering Sep 2022 – May 2026

  - **Relevant Coursework:** Data Structures & Algorithms, OOP, Database Management Systems, Computer Networks, Operating Systems, Software Engineering

PUBLICATIONS

- **HerbAI (IEEE Xplore, 2025)** — Peer-reviewed publication on a hybrid CNN–Vision Transformer model for offline image classification, 92% validation accuracy across 40 classes. *Tech: TensorFlow Lite, Flutter, Python* IEEE Xplore

ADDITIONAL

- **AI/ML :** Python, TensorFlow Lite, CNN, LLM API Integration, RAG concepts, Prompt Engineering
